

FieldSync Pro

A team app for high school and club track and field

Your practices, your athletes' splits and your team's messages in one place. **Free for teams, with no ads.**

iPhone

App Store, search FieldSync Pro

Android

Google Play, search FieldSync Pro

Computer

pro.fieldsync.live

Set up your team in three steps

1 Create a coach account

Choose Coach and pick your school from the list. Every NYC high school with a track team is already there.

2 Create your team

Give it a name. Your team gets its own code.

3 Share the code

Athletes and parents use it to ask to join, and you approve them.

What you can do

- Schedule practices and meets, with the weather forecast for each one.
- Give each event group its own work, and set running sessions with target paces.
- See every split and mark your athletes log.
- Send an announcement by notification and email, and see who read it.

Made for teams of teenagers

- **Nobody under 13** can sign up.
- **A second adult** is part of every conversation with an athlete under 18. The app enforces it.
- **Parents** see the schedule and every change, never anyone's results.
- **Lightning:** one tap starts a 30 minute hold. The app counts it and tells the team. Going back out is your call.
- **Apple Health** detail from an athlete's watch is shown only to that athlete.
- **Report or block:** anyone can report a message or block a person, and reports reach a person who reviews them.
- **On Instagram** at @fieldsyncpro. Want your team in a post or a video? Message us there. We never film or post anyone under 18 without a parent's written OK.
